

Compostable T-Shirt Bags

Applications

- Grocery and Retail stores
- Gift and Convenience stores
- Shopping Centers
- Restaurants
- Farmers Markets

Features & Benefits

- Best sustainable option and perfect solution where compostable bags are mandated.
- Contains plant-based renewable materials derived from corn starch and vegetable oils, safe to the environment.
- Manufactured in the USA.
- Certified by the Biodegradable Product Institute (BPI).
- Meets ASTM D6400 compostable test standards.
- Available in Natural film color (neutral beige) and Green tinted film (light green).
- Our green-tinted bag complies with Washington regulations (SB5323), standing out as a compostable bag.
- For best results, use within one year of manufacturing. Store in a cool, dry place.
- Fully degrades in less than 180 days in a commercial composting facility (not suitable for home composting based on resin properties).
- Bags can be reused for the separate collection of food waste, composted together with the food waste it will turn into fertilizer.
